## About

Sunshine Coast Grammar School recognises the importance of preparing students to contribute locally, nationally and globally in the 21st century and are equipping students with the digital tools to enhance and transform learning. Innovation, creativity, collaboration and problem-solving skill sets are vital tools to empower students for the future.

Member of the following associations:
- Presbytrian Methodist Schools Association

## Our online learning journey

Sunshine Coast Grammar School started working with Education Perfect in 2018 through the Languages faculty.

In the same year, the remaining subject areas trialled Education Perfect and subsequently subscribed to the full learning suite.

## Why Education Perfect (EP)

EP is a world standard platform for remediation and data collection to inform teaching and learning. It is also useful in remote delivery, flipped learning and revision.

We went with EP as our Learning Management System did not have anywhere near the functionality for this and the time required by staff was not effective.

Chris Smith
Head of Learning Area - Science

---

"Education Perfect engages those that need it most. During a recent literacy competition, two students who had struggled with their language skills in the past made huge improvements and finished 1st and 2nd in the year level. They were so proud of their efforts."

**Elliott Cowan**
English Teacher
Sunshine Coast Grammar School

---

## Impact

- Greater visibility of both progression and learning / retention / 'understanding' for the classroom teacher.
- EP seeks to gamify the learning experience and put the 'homework' in the hands of students via their personal computing device so they can do all or part when they 'have time'.
- As with any data driven decision in teaching, data is key! The amount, options and visibility of student data is great. We can see completion, time on task, trouble areas, create class improvement reports, usage across departments as well as target remediation.
